

## ENVIRONMENTAL POLICY

### **Fruit**

We are passionate about the quality and ethics of all of our fruit. We use the highest grade of fruit at all times, which reduces wastage. We use fruit that has come from sources as local as possible to support British fruit farmers and we never buy fruit that has been air freighted. We use fair trade fruit where available.

### **Boxes**

Our boxes are made from cardboard that can be fully recycled. We actively encourage clients to make empty boxes available to us to collect at the time of the next delivery in order that they can be re-used as far as possible or otherwise recycled.

We also arrange re-use of the original boxes that the fruit arrives in when bought from the wholesale fruit markets by passing on those boxes to other companies who can utilise such boxes.

### **Transport**

We run a modern and fuel efficient fleet of vans. Our delivery routes are meticulously planned to ensure that route timing and mileage is minimised.

### **Administration**

Our administrative function strives to minimise its use of paper and other resources as far as possible. For example, all invoices are sent out electronically to avoid unnecessary paper use.
